Built-In Angular Validators

required	Requires any non-empty value
minLength(x)	Requires a value of at least x characters
maxLength(x)	Requires a value of no more than x characters
min (x)	Requires a numeric value $\geq x$
max (x)	Requires a numeric value $\leq x$
email	Requires a standard email format
pattern(regex)	Requires a value matching the supplied regex
requiredTrue	Requires a value of true. Often used with checkboxes.
